

## **MSc in Management Program Intended Learning Outcomes (PILOs)**

Upon the completion of the MSc in Management Program a student is able to:

### **A. Knowledge and Understanding**

- A1. Identify different theories and concepts to explain management matters and business decisions in firms.
- A2. Use appropriate theories and concepts to real-world problems/opportunities at a business level.

### **B. Intellectual Skills**

- B1. Diagnose business problems and opportunities an international or domestic organization might be confronted with by analysing and evaluating business data.
- B2. Critically reflect on the existing management literature by reviewing academic and practitioner sources and conducting primary research.

### **C. Practical Skills**

- C1. Apply managerial skills and opt for the appropriate business decision tools and frameworks to solve real-world problems and produce applicable recommendations.
- C2. Use information technology (spreadsheets, management software, databases) to interpret and analyse financial and business-related data.

### **D. Transferable Skills**

- D1. Demonstrate professional behaviour, communicate, present effectively, and convert ideas into specific recommendations and actions.
- D2. Work collaboratively, exercise team leadership, respect diversity, function in a multicultural environment, manage group conflict and produce team outcomes.
